

Find your next European trip idea.

WHAT IT IS

eURo TRIP is a curated travel-discovery platform for Europe. It's positioned as the step before Google Maps and Tripadvisor — an idea-finder, not a booking site. Instead of aggregating every option, it surfaces a smaller, curated set of destinations across Europe, from major cities to towns most travelers never hear of, sourced from Wikipedia and Wikivoyage.

KEY FEATURES

- **Curated, not cluttered**
Content from Wikipedia and Wikivoyage — no ads, no paid placements.
- **Guided trip planning**
A step-by-step questionnaire builds a route across multiple destinations.
- **No account needed**
Saved trips stay in the browser — anonymous, no data sales.
- **All of Europe, in focus**
From capital cities to quiet small towns, all in one place.
- **Interactive map**
Routes rendered on an interactive map with transport-mode filters.
- **Export & share**
Routes can be exported as PDF or shared via link.

POSITIONING

"eURo TRIP doesn't replace Google Maps or Tripadvisor — it comes before them. We help you find an idea in the first place, before you get into the details."

QUICK FACTS

- Built independently, from scratch, by a single developer.
- Hosted on Vercel · built with Next.js.
- Location and vibe data drawn from Wikipedia, Wikivoyage and Wikidata.
- No ads. No account required. No data sales.
